For Grown-Ups: How to Use These Worksheets 7 / 7

A few minutes at a time, for kindergarten and first grade. Print it before the other counting strips.

Why use it

Counting by tens means saying every tenth number, where each word stands for one more group of ten. The tens are the decade names, twenty, thirty, forty, that come after each 9, so a child who knows them in order knows where a count goes next.

What it is good for

- Counting bars of ten by tens to find the total.
- Filling in a 10 to 100 strip.
- Counting on by tens from a number that does not end in 0, such as 3, 13, 23, and past 100 for first grade.

How to use it

1. Before the sheet, bundle ten straws in a hair tie and count the bundles: 10, 20, 30.
2. On the bar pages, your child points to each bar, counts by tens, and writes how many.
3. Check one bar by counting it by ones, so the tens are groups and not only a chant.
4. On the strips that start at 3 or 13, say them aloud together: only the tens change.
5. Check with the answer key, where each answer sits where its question is.

Try saying: “Each bar is ten. Ten, twenty, thirty. How many bars? So how many in all?”

Tip: Listen for onety or fivety. English breaks the pattern there, so say the real names in order.
