For Grown-Ups: How to Use These Worksheets

5 / 5

One page at a time, after the labeled line, for pre-K and kindergarten.

Why use it

Naming the place of an animal you point to is easier than finding the animal in a given place, so it comes first. The psychologists Colomé and Noël found that children named a position more accurately than they picked one out. Every page has the start flag, because a place is counted from the front of the line.

What it is good for

- Naming every place from first to tenth.
- Reading the short forms, such as 3rd and 7th.
- Pre-K and kindergarten.

How to use it

1. Find the flag together. The animal next to it is first.
2. Point to an animal with an arrow and ask which place it is in.
3. Your child counts from the flag, one animal at a time: first, second, third.
4. Your child circles that place from the three under the animal.
5. Check with the answer key on page 4, where each page has the right place ringed in red.

Try saying: “Which place is the fox in? Start at the flag and count: first, second, third.”

Tip: If your child starts counting from the back, point to the flag again. Every place begins at the front of the line.
