For Grown-Ups: How to Use These Worksheets

One page at a sitting. For second grade.

Why use it

Second graders tell time to the nearest 5 minutes and learn a.m. and p.m. (Common Core 2.MD.C.7). Each number on the clock stands for 5 minutes on the long hand, so a child counts by 5s from the 12 to the long hand: the 4 is 20 minutes. The short hand still says the hour by the last number it passed. Every 5 minute mark and every hour is on this sheet.

What it is good for

- Counting by 5s around the clock to read the long hand.
- Reading the hour when the short hand is nearly at the next number.
- Writing minutes with two digits, such as 4:05.

How to use it

1. Your child finds the hour first, from the short hand.
2. Starting at the 12, your child counts by 5s to the long hand.
3. Your child writes the hour, then the minutes, with a 0 in front of 5.
4. Check with the answer key, where the answers are in red.

> **Try saying:** “Count by 5s from the 12. Where does the long hand stop?”

Tip: The Blank Clock Faces sheet has a page with the minutes printed around the rim. Use it beside this sheet, then put it away.
