For Grown-Ups: How to Use These Worksheets

One page at a sitting. For first grade, after the hour sheets.

Why use it

Half past is the second half of the first grade standard (Common Core 1.MD.B.3, TEKS 1.7(E)). At half past, the long hand points to the 6 and the short hand sits halfway between two numbers. The short hand says the hour by the last number it passed, so 3:30 is read from the 3, not the 4. This sheet mixes in o'clock times so your child has to look at the long hand every time.

What it is good for

- Reading half past from a long hand on the 6.
- Reading the hour from the number the short hand has passed.
- Telling o'clock from half past on the same page.

How to use it

1. Look at the long hand first: on the 12 is o'clock, on the 6 is half past.
2. Find the short hand. Which number has it passed?
3. Your child writes the hour, then 00 or 30.
4. Check with the answer key, where the answers are in red.

> **Try saying:** “Where is the long hand? Which number has the short hand passed?”

Tip: A common slip at half past is reading the number the short hand is moving toward. Ask which number it has already passed.
